

PRESS ADVISORY

Spectra Logic Teams with SAN File System Provider Scale Logic

Scale Logic's HyperFS Storage Management Application Integrates SAN and Archival Workflows and is Now Certified with Spectra Logic's T-series LTO Tape Libraries

May 19th, 2014—[Spectra Logic](#), celebrating more than 30 years of data storage innovation, today announced a worldwide relationship with Scale Logic, Inc. to provide broadcast and media customers with HyperFS, a high-performance, cost-effective SAN application platform with a tightly integrated HSM-based archival workflow options. The relationship enables Spectra Logic and Scale Logic to meet in the global Media & Entertainment VAR channel with cross-certified products.

“Certification of Scale Logic’s open platform SAN and Archival application suite enables our VAR customers to sell and deploy end-to-end, fully converged solutions that are tightly integrated, automated, simple to manage and offers robust content protection and accessibility,” said Hossein ZiaShakeri, Senior VP Business Development, Media & Entertainment “Data archiving occurs seamlessly in the background, managed by customer defined data movement policies while leveraging very high scalability SAN infrastructure to deliver fast, easy access to archived content”.

“Spectra Logic is renowned for their tape libraries, as well Spectra Logic is already a trusted brand for our VAR channel in the global M&E vertical market,” said Bob Herzan, President & CEO. “This partnership gives our mutual customers a powerful option to deliver a hardware-agnostic SAN solution that can readily leverage Spectra’s robust product line.”

Herzan added, “Scale Logic is well aware that video archiving is a critical objective for broadcasters and media organizations as digital content management requirements exponentially increases. Our integrated HSM application component can address the complete range of Spectra’s offerings from the T50e tape library, which scales to a native capacity of 75TB to their enterprise-class [T-Finity](#), which supports a native capacity of 600 petabytes or more than 25 million hours of video content.”

Spectra [T-Series tape libraries](#) offer highly reliable, high-density storage and seamlessly scale from hundreds to millions of hours of archived digital content. With storage capabilities that reach exabyte capacity levels, Spectra’s tape libraries deliver the capabilities broadcast organizations need to safely store and manage massive amounts of content for high-value, high-impact news production. In addition, Spectra libraries offer efficient, comprehensive library management tools and [Spectra Certified Media](#) that simplifies management, extends the life of tape media and drives, and ensures data is secure and available when needed.

About Spectra Logic Corporation

At Spectra Logic we define, design and deliver innovative data protection and backup solutions through tape backup and disk-based backup, recovery and archive storage solutions. By igniting innovation we challenge expectations of the data protection market with intelligent, integrated, and simple to use backup and archive technologies. Throughout our 30-plus-year history we have delivered high-density, feature rich storage with unmatched service and support to customers worldwide. For more information, visit www.SpectraLogic.com.

[About Scale Logic Inc.](#)

Scale Logic, Inc. is a value added global solutions company focused on storage and networking infrastructure for the Media & Entertainment market. We bring value to our partners by building a suite of products and services to help scale their business effectively and efficiently. Our sales and technical team are seasoned veterans with over 25 years of experience in developing, deploying and supporting high performance digital file-based solutions. Scale Logic, Inc. has developed strategic relationships around RAID, SAN, Archive, Object storage and Cloud storage technology that focuses on logical solutions to complex storage needs. Our consultative approach offers our customers options that consider performance, reliability, scalability and budget.
