

Telestream products span the entire digital media lifecycle, including video capture, encoding, transcoding, captioning, playback and inspection, delivery, live streaming, and intelligent workflow automation while accessing shared storage as a part of the overall workflow.

— FC    — 1 Gigabit    — HD SDI

## SYNERGY

Affordable SAN storage with application server, unlimited Windows, Linux or Mac client licensing via HyperFS, 2TB, 4TB, 6TB, or 8TB SAS drives, RAID 6 or 7.3, **connectivity:** Quad 1Gbps plus dual port 8, 10, 16 FC, or 1/10/40 Gbps HBA, one year support/warranty, options for 5+ extensions

## Unlimited Scalability

12, 24 & 36 Bay expansion, easily scale by adding another SYNERGY and growing a single file system

## Clear differences and value

- Unlimited HyperFS client licensing
- No MDC hardware needed
- Supports multiple streams of 4K for DPX workflows
- Supports block and file workflows under a single global namespace
- Application intelligence can learn I/O patterns/behaviour
