Scale Logic's Interoperability Lab qualifies Adobe Creative Cloud with the Genesis Platform and enterprise solutions from NetApp, HPE and Hitachi.

See Scale Logic at IBC 2017

(**Bloomington, MN – September, 13, 2017**) In order to understand customer workflow and mirror it internally prior to deployment, Scale Logic has invested over \$1M in industry specific applications and network infrastructure to create a fully-functioning, media-centric interoperability lab. The multi-functional lab gives creative professionals the ability to create and test across different technologies. Visitors to IBC can meet the Scale Logic team at 7.H39.

“In the Media & Entertainment (M&E) industry, very few workflows are the same, so allowing customers access to the lab allows them to try several types of technology to ensure confidence in their investment. Our customers will be able to collaborate at unprecedented levels and the ability to mix and match tools to fit their workflow needs and budgets,” stated Daryl Heinis, CTO, Scale Logic.

Interoperability testing ensures that converged solutions are integrated based on strict guidelines including OS versioning, drivers, connectivity, servers, workstations, and applications. The lab integrates over 75 M&E workflow and editing applications such as Adobe® Premiere® Pro CC, Telestream Vantage, Reach Engine by Levels Beyond, and others, and utilizes various storage platforms: Block Level SAN, Scale-Out NAS, SAN appliances, NAS, and Archive.

Heinis commented, “One of the lab’s most valuable features is the 24x7 access it allows for M&E partners, editors, and end-users around the world to test the differences in SAN, NAS, Scale-Out NAS and other associated technologies which has allowed for a more educated decision for our customers and partners.”

FOR IMMEDIATE RELEASE

About Scale Logic

Scale Logic is a storage-centric solutions company, servicing broadcast, OTT, streaming, and video production workflows. These solutions are designed specifically for customers requiring high-performance, highly reliable data storage and network infrastructure.

Scale Logic's value to customers is demonstrated by its consultative approach and customer support for entry-level and mid-tier storage solutions, to global enterprise platforms, including Scale-Out NAS, SAN, and archive. Scale Logic offers a complete suite of lifecycle management, workflow enhancements, solution design, installation, extended warranty options, and system integration.

If you are at IBC 2017 (Stand: 7.H39), come explore demos on our Genesis Unlimited Appliance featuring SSD performance driving compressed and uncompressed 4K workflows. See demos of HyperFS file system and extended warranty support options for tier one OEMs like; EMC, HDS, IBM and Brocade.
