ULTRAHD

Solutions for Post, Broadcast, Video, Film, Sports, and other media-intensive workflows

Let's have a conversation.

We want to learn about your workflow.

Consultation, design and installation

SAN and Scale-Out NAS

File-based workflows

Media asset management

Archive and disaster recovery

Infrastructure support

Customized support services

There is a fit.

PROCESS

DISCOVER

We collaborate with our clients to enhance their workflow before submitting multiple designs.

DEVELOP

We work with our customers to create a plan that will integrate smoothly with their time lines and budgets.

IMPLEMENT

Our experts will build, test and deploy an optimal system: from SAN and Scale-Out NAS, to archive and asset management.

PROTECT

Whatever your data retention needs are we will ensure that a comprehensive archiving solution is in place from the start.

SERVICE

OPEX budgets are important and we strive for strong ROI throughout the lifecycle of any solution we develop.

Our approach can address all, or just a part of any media-centric storage ecosystem.

SOLUTIONS

Our products and services support multiple industries including: M&E, House of Worship, Healthcare, Education, Retail, Sports, and Life Sciences

Media-optimized shared storage

Scalable high-performance expansion with single or dual controller options

Integrated Scale-Out NAS and SAN

High-availability, modular storage platform that supports both block and file-based protocols simultaneously to deliver high-bandwidth in a single global namespace

Archive and data protection

Options for object storage, tier two disk, tape, and cloud application platforms

Application workflow support

Ingest, transcoding, editing, finishing, rendering, PAM, MAM, playout, streaming, and cloud archive

WHY SLI

30

Years of Experience
With a history going all the way back to analog, our team understands the technology. From planning and implementation to our deep R&D based tech support knowledge, we have you covered.

Exhaustive Testing
We've invested heavily in our interoperability lab. We test our products, we test the applications, and, most important of all, we test and attempt to mirror our customers' workflows.

Certifications
Relationships with industry leading companies do not come without a firm commitment to a thorough understanding of the software's architecture and how customers work.

Strong Partnerships
Lets face it, no company can be everything to everyone. This is why we pride ourselves on developing relationships in the industries that compliment our commitment to our customers.

Long-term ROI
We help ensure organizations are well-positioned for the ongoing need for data management, growth, and support.
