Video production and broadcast demand robust solutions for their workflows.

When organizations need a solid and reliable solution to store and deliver content for broadcast and video production they have turned to Scale Logic (SLI). As venues and digital asset requirements change, SLI has evolved into a full service company that can provide end-to-end solutions from content capture and playback to extending the ROI of valuable production storage and networking.

Our services in a nutshell

- *Hybrid storage application platforms*
- *Enterprise NAS storage and file servers*
- *Cost-effective metadata controllers*
- *XFS, ZFS and HyperFS file system management*
- *FC, Ethernet and iSCSI connectivity options*
- *Customized extended warranty programs for major OEMs*
- *Refurbished and certified nodes, clusters and switches*
- *Buyback and trade in programs with refresh*
- *Certified asset recycling*
- *Integration and design*

media loft

Media Loft is a 100% employee-owned company that produces corporate events across the globe, with account, technical, creative, design, video production and interactive technology services all under one roof.

## Editing efficiency and data protection

Their storage platform consisted of Facilis TerraBlock and did not have a global file system. This scattered projects that caused loss in productivity in searching and organization of key media files.

Replacing the TerraBlock solution with the single scalable HyperFS file system and Genesis RX2 RAID storage system not only gave them seamless data flow but provided the data throughput for a huge amount of high-definition video streams and data file copies.

Celebrating over 25 years in the industry, Scanline VFX specializes in creating complex visual effects for high end, block buster feature films with studios worldwide.

Our customer says it all

"Our collaboration with Scale Logic over the past year has realigned our buying strategy to incorporate refurbished storage as an alternative to new equipment. This new outlet has been a game changer for our IT infrastructure and budget. We have added additional NL 400 nodes and created an offsite storage cluster with over 3PB and, expanded our primary production cluster to over 4PB. Scale Logic has guided us through that process from a technical and logistical perspective with optimal results by delivering increased capacity with on-site installation and 24x7x4hr support. Their consultative approach and expertise of market strategy has been a great tool to utilize. " - Scott Miller, Studio Manager, Scanline VFX

- Post warranty support
- Customized short term pro services
- Time for POC
- Capacity expansion
- Cash back savings for legacy hardware
- Asset recycling
